School News:

We would like to take this opportunity to wish pupils, staff, community users and the community a happy, healthy and peaceful New Year.

Our first week back this term was Science week. We started with a whole school assembly from 'Hands on Science' where the children were introduced to the different types of work that scientists do.

Each class then had the opportunity to work with the scientists to investigate different themes. Children in foundation stage explored 'Lovely Light' and were very knowledgeable. Key Stage one children enjoyed the 'Rocket Challenge' and made their own rockets! In Unit Two, the children learnt about constellations and made their very own stargazers. Year Five participated in a workshop called 'Kitten Rescue' where they had to experiment with different materials to find out which would work best to keep a kitten warm and hydrated. In Year Six, the children became forensic scientists as they looked at how blood spatters are used as evidence and how forensics can help reconstruct the events that take place at a crime scene. We had a great fun and learnt lots of new scientific information.
